

Air Curtains

2013

rosenberg

Description

The new and attractive generation of Airtècnics air curtains is the ideal solution to maintain a comfortable interior climate in commercial outlets and public buildings that need to keep their doors open.

Airtècnics air curtains create an air stream layer over the doorway and act as an invisible barrier which efficiently divides the inside environment from the outside one. Therefore, it substantially reduces heating and cooling costs up to 80%, while increasing employees and clients comfort.

For shops, Airtècnics air curtains allow a clear view of the inside of the shop, welcoming the client to enter easily and freely. The end result is

more customers and an increase in sales. Airtècnics air curtains are a protection from the cold and heat, repel gusts of wind and minimize dust, fumes, pollution and insects entering the building.

In order to obtain these advantages it's very important to choose the appropriate air curtain. Factors such as interior drop, strong winds, the door's location, stairs between floors, opposite doors, and the installation height have to be taken into consideration.

Our expert consultants with their extensive experience are at your disposal to help you choose.

Advantages

MAINTAINS

- Heating levels
- Refrigeration
- Air conditioning
- Comfort
- Clean atmosphere

PROTECTS FROM

- Cold winter temperatures
- Hot summer temperatures
- Car fumes
- Dust in the air
- Pollution
- Bad smells and odours
- Insects

Selection of an air curtain

To select an air curtain the following factors have to be kept in mind:

- The height of the installation measured from the discharge diffuser to the floor
- The width of the door
- The location of the building to determine the level of protection needed against weather conditions
- If the building has several doors in the same, different or opposite façade
- If the building has several storeys connected by escalators
- Pressure differences between the inside and outside of the building
- Door characteristics: if always open, if automatic door, manual door, revolving door, etc...
- Characteristics of the ventilation and air conditioning installation
- Voltage and electrical power availability
- Type of business, style and decoration of the premises

applications

Model	Kind	Recommended Installation Height (*)	Heating A E P	Common Applications
Minibel		Up to 1.8 m	• •	Kiosks, Fast Food and small sized shops. Restaurants and places with usually closed door or automatic door when low pedestrian flow.
Optima Recessed Optima		2.2 - 2.5 m	• • •	Small and medium sized premises. Restaurants, shops and places with a medium and high pedestrian flow. Creation of different environment zones. Protection against dust, fumes, pollutants and insects. False ceiling installations. Isolation and sealing of smoking areas.
Windbox, Dam Recessed Windbox WEC, REC (G only) Deco, Variwind Zen, Rund (M,G only) Windbox DX (M,G only) Duojet (M,G only) Rotowind (M,G only) Kool (A only) Invisair Compact (M/A only)	S M G	2.5 - 3 m 2.8 - 3.5 m 3.2 - 4 m	• • • • •	Medium and large sized premises with a high pedestrian flow. Protection against dust, fumes, pollutants and insects. Cold rooms. False ceiling installations. Isolation and sealing of smoking areas.
Triojet		2 - 3 m	•	Industrial doors for large cold rooms and freezers.
Windbox	L XL	4 - 5 m 6 - 11 m	• • • •	Medium and large sized premises with a high pedestrian flow. Industrial doors. Protection against dust, fumes, pollutants and insects. Cold rooms. False ceiling installations.
Max		5 - 6 m	• • •	Industrial doors. Loading dock. Vertical Installation to one side of the door or at each side of the door. Horizontal Installation.

(*) The maximum height of installation depends on the conditions of the premises. Contact us to clear up your queries or doubts.

(A) Air Only, (E) Electrical Heating, (P) Water Coil Heating LPHW.

Characteristics

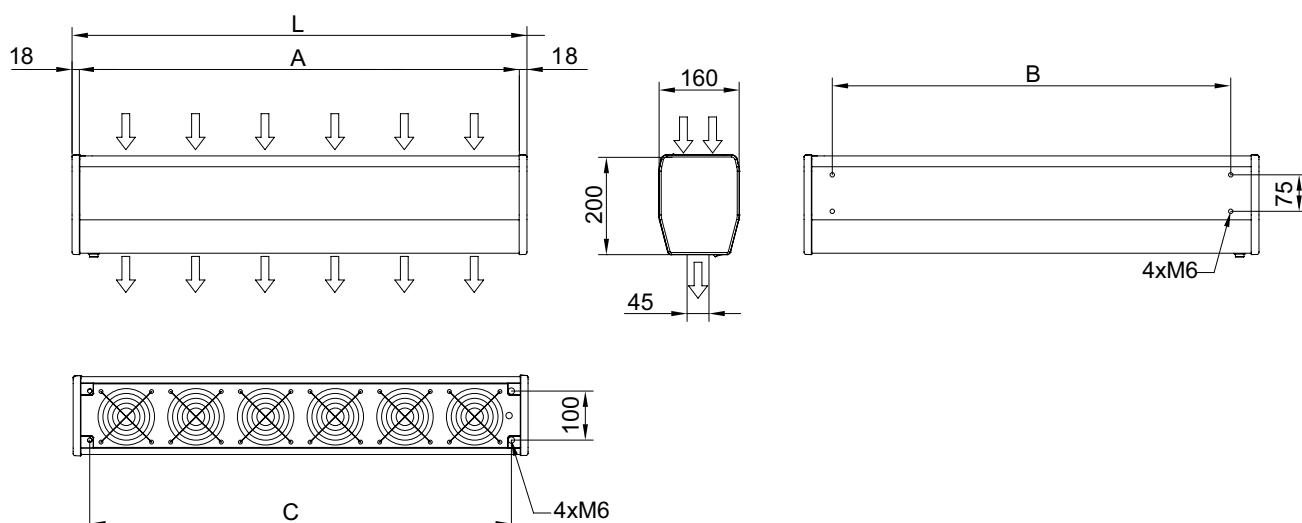

- Self-supporting casing construction made of galvanised plated steel, painted epoxy-polyester structural white colour RAL 9016.
- Low noise compact axial fans.
- "E" type with heating includes electrical shielded element. "A" type is without heating, air only.
- Linear blow-out jets with airfoil profiled anodized aluminium vanes.
- Integrated switch for ventilation and heating control.
- Cable connection 1,5m length, integrated.
- Wall support included.

Layouts and dimensions

Free hanging mounting

Inside ceiling surface mounting

False ceiling invisible mounting

Characteristics

- Self-supporting casing construction made of galvanised plated steel, ready to be installed recessed in a false ceiling.
- The inlet grille (aluminium profile) and blow-out nozzle are integrated in a single white frame, colour RAL 9016. Other colours are available on request.
- Centrifugal double-inlet fans driven by an external rotor motor with built-in thermal protection contact provided with 5-speed selection. Very low noise level.
- "P" type includes water heated coil (2x3/4"). "E" type includes electrical shielded element, 3 power stages with power switches included. "A" type is without heating, air only.
- Anodised aluminium outlet vanes, airfoil shaped, adjustable from 0 to 15° each side.
- Control panel and infrared remote control IR included. 7m of telephone cable with fast connectors type RJ45 (Plug & Play). Optional: Interface to connect to BMS.

Characteristics

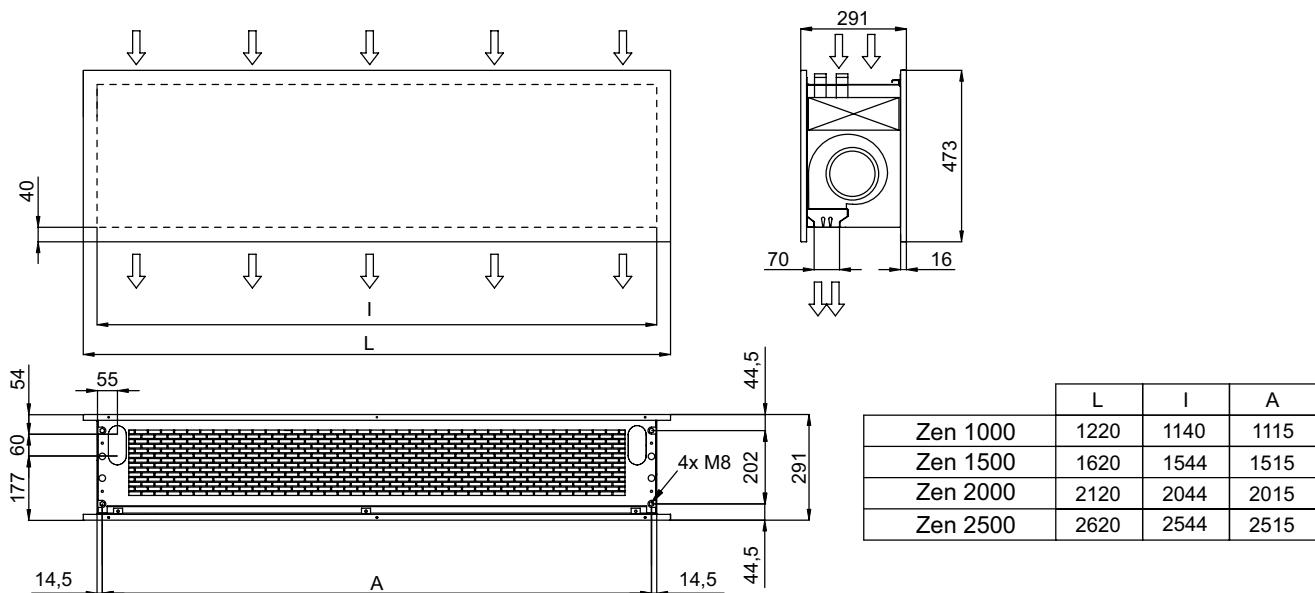

- Decorative air curtain in contemporary architectural style. Its minimalist and smart design integrates in any environment and we offer the option to customise, meeting our clients need.
- Can include personalised logos, signs, graphic designs, etc...even can incorporate clocks, lighting, etc.
- Front panels are anodised aluminium. Options for stainless steel and gloss, matt or brushed paint finishes. Other materials are possible as wood, metal stressed finish etc...
- Central structure made of zinc plated steel finished in black forge as standard. Other colours available on request.
- Centrifugal double-inlet fans with external rotor motors, with built-in thermal protection contact, provided with 5-speed selection. Very low noise level.
- "P" type includes water heated coil (2x3/4"). "E" type includes electrical element with 3 power stages. "A" type is unheated, air only.
- Anodised aluminium outlet vanes, airfoil shaped, adjustable each side.
- Control panel and infrared remote control IR included. 7m of telephone cable with fast connectors type RJ45 (Plug & Play). Optional: Interface to connect to BMS.

Dimensions

Finishes

- Painted any RAL colour or metal
- Different materials: aluminium, stainless steel AISI 304 (brushed or polished), wood, glass, PVC/PES, etc.
- Logos, lights, clocks, signs, vinyls, patterns, etc.

Examples of customised front panels, to meet customers needs

Characteristics

- Decorative round air curtain for vertical or horizontal installation.
- Faceted self-supporting casing construction made of galvanised plated steel, finished in structural epoxy-polyester white RAL 9016 or silver grey RAL 9006 as standard. Other colours or stainless steel construction are available on request.
- Double-inlet centrifugal fans with external rotor motors, with built-in thermal protection contact, provided with 5-speed selection. Very low noise level.
- Perforated inlet grille with filter functions and easy service. It does not need pre-filter.
- "P" type includes water heated coil (2x3/4"). "E" type includes electrical shielded element, 3 power stages with power switches included. "A" type is without heating, air only.
- Anodised aluminium outlet vanes, airfoil shaped, adjustable from 0 to 15° each side.
- Control panel and infrared remote control IR included. 7m of telephone cable with fast connectors type RJ45 (Plug & Play). Optional: Interface to connect to BMS.

Characteristics

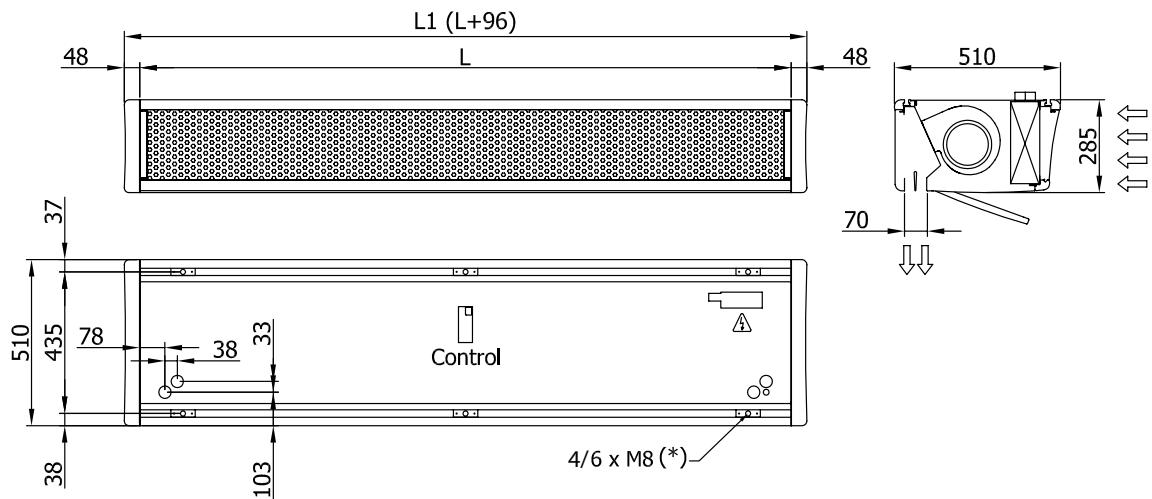

- Structure made of aluminium profiles and galvanised plated steel panels, finished in structural epoxy-polyester white RAL 9016 or silver grey RAL 9006 as standard. Other colours are available on request.
- Centrifugal double-inlet fans driven by an external rotor motor with built-in thermal protection contact. Provided with 5-speed selection. Very low noise level.
- Micro-perforated inlet grille with filter functions and easy service. It does not need prefilter.
- "P" type includes water heated coil (2x3/4"). "E" type includes electrical shielded element, 3 power stages with power switches included. "A" type is without heating, air only.
- Anodised aluminium outlet vanes, airfoil shaped, adjustable from 0 to 15° each side.
- Control panel and infrared remote control IR included. 7m of telephone cable with fast connectors type RJ45 (Plug & Play). Optional: Interface to connect to BMS.

Details

Joining two units

(*) Adjustable fixing points through guide rail

Different colour finishes

Characteristics

- Self-supporting casing construction made of galvanised plated steel, finished in structural white RAL 9016 as standard. Other colours or stainless steel construction are available on request.
- The inlet is made behind the front panel. It does not need maintenance.
- Front panel with option to customise and the possibility of including personalised logos, signs, graphic designs, images, etc.
- Centrifugal double-inlet fans driven by an external rotor motor with built-in thermal protection contact provided with 5-speed selection. Very low noise level.
- "P" type includes water heated coil (2x3/4"). "E" type includes electrical shielded element, 3 power stages with power switches included. "A" type is without heating, air only.
- Anodised aluminium outlet vanes, airfoil shaped, adjustable from 0 to 15° each side.
- Control panel and infrared remote control IR included. 7m of telephone cable with fast connectors type RJ45 (Plug & Play). Optional: Interface to connect to BMS.

Dimensions

EC Technology

EC technology (Electronically Commutated) combines AC and DC voltages, bringing the best of both technologies: the motor runs on a DC voltage, but with a normal AC supply.

The EC motor incorporates voltage transformation within the motor. The non-rotating part of the motor (stator) is extended to make room for an electronic PCB board which includes power transformation AC to DC, as well as the controls.

EC motor have no slippage losses, reducing losses and increasing efficiency versus AC motors.

EC Motor Principle

- Permanent-magnet brushless DC motor within the rotor.
- The stator is driven by electronic switches (which replace the Carbon brushes), controlled by a microcontroller.
- Electronic system (hall effect sensor or software is used to recognize the rotor position).
- AC operated 230Vx1 or 400Vx3, valid for 50/60Hz.

Advantages and Benefits

The new Airtectics EC Air curtains are fascinatingly efficient reducing the running cost of the ventilation up to 67% using EC instead of AC fans.

- Energy savings : Minimum power consumption & better efficiency than AC equivalent.
- Low motor temperature : for longer lifetime than AC equivalent
- Simplicity : Electronic & power transformation are completely integrated within the motor.
- High performance: Speed can be driven up to 3600rpm.

Available EC Air Curtains: Windbox SMG, Wec, Rec, Deco, Kool, Recessed Windbox, Dam, Duojet, Variwind, Rund, Zen, Rotowind and Invisair.

EC vs AC Air Curtain - Energy Saving Example

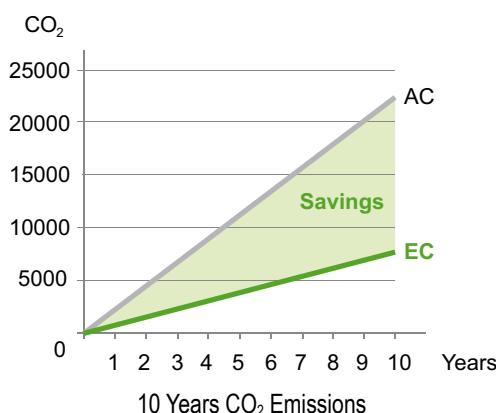

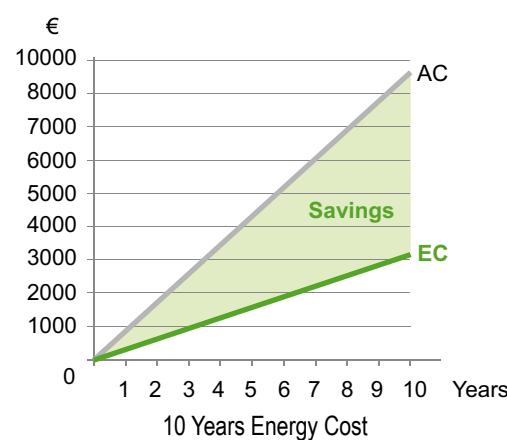

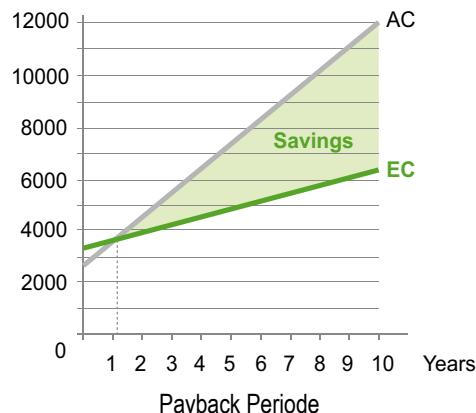

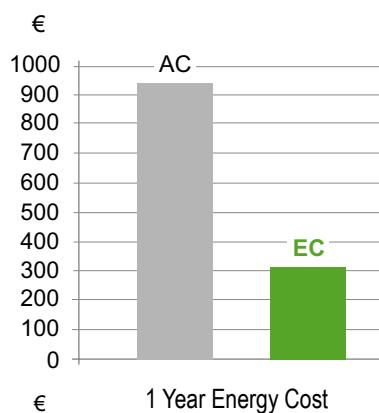

How much money can I save using an EC Air curtain?

Example:

Door dimension: 2 m width by 3 m height
Running time: 12 hours/day, 6 days/week,
50 weeks (~ 1 year)
Energy cost: 0,17 €/kW/h (EU-27 average cost)
Selected unit: G 2000

	AC Air Curtain		EC Air Curtain		Difference
Total Fans Power	1,530	kW	0,504	kW	- 1,026 kW
Air Curtain Price	2.600	€/unit	3.300	€/unit	+ 700 €
Energy Consumption	5.508	kW/h	1.814	kW/h	- 3.694 kW/h
Energy Cost	936	€	308	€	- 628 €
CO2 Emissions	2.203	kg	726	kg	- 1.477 kg

Result: The payback period is 1,4 years. We recover the price increase of EC air curtain in less than two years and then we start saving energy, money and reduce CO₂ emissions to the environment.

Characteristics

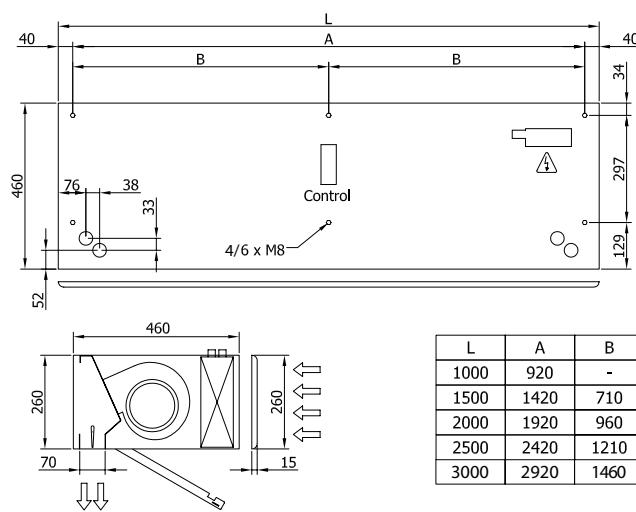

- Assembled with low consumption EC fans that save up to 67% of the energy without decreasing the airflow.
- Self-supporting casing construction made of galvanised plated steel, finished in structural epoxy-polyester RAL 9016 as standard. Other colours or stainless steel construction are available on request.
- Centrifugal double-inlet fans driven by an external rotor motor with built-in thermal protection contact. Provided with 5-speed selection. Very low noise level.
- Micro-perforated inlet grille with filter functions and easy service. It does not need prefilter.
- "P" type includes water heated coil (2x3/4"). "E" type includes electrical shielded element, 3 power stages with power switches included. "A" type is without heating, air only.
- Anodised aluminium outlet vanes, airfoil shaped, adjustable from 0 to 15° each side.
- Control panel and infrared remote control IR included. 7m of telephone cable with fast connectors type RJ45 (Plug & Play). Optional: Interface to connect to BMS.

Heat Pump Technology

Heat pump is a device that uses a small amount of energy to move heat from one location to another. This system is extremely efficient because they simply transfer heat, rather than burn fuel to create it. It consists of a closed circuit through which a special fluid (refrigerant) flows. This fluid takes on a liquid or gaseous state according to temperature and pressure conditions.

The circuit is composed by: compressor, condenser, expansion valve and evaporator.

Advantages and Benefits

The new Airtecnics Heat Pump Air curtains are absolutely efficient reducing the heating cost and CO₂ emissions up to 70%.

- Very high energy efficiency ratings to save big amounts of money on your energy bill
- Short Payback Period thanks to very high level of energy saving
- Heating and cooling included in the same system (reverse cycle)
- Environmentally Friendly as uses such low amounts of energy

Available Airtecnics Heat Pump Air Curtains:

- Heating/Cooling: Windbox SMGLXL, Dam, Recessed Windbox, Wec, Rec, Variwind VW and Duojet.
- Only Heating: Deco, Rund, Zen, Rotowind, Variwind VP and Invisair.

Heat Pump vs Electrical Air Curtain - Energy Saving Example

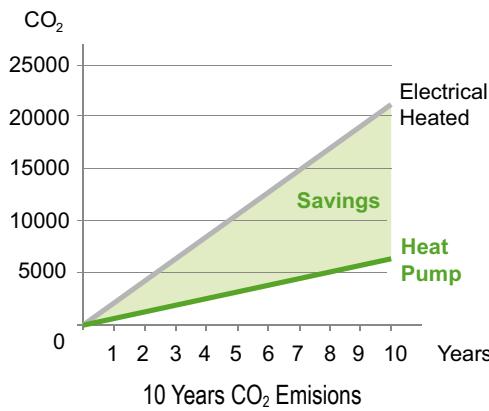

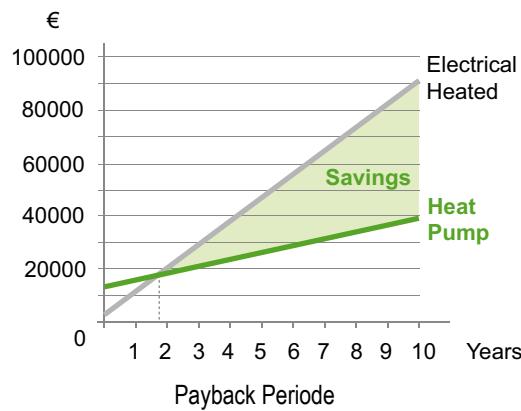

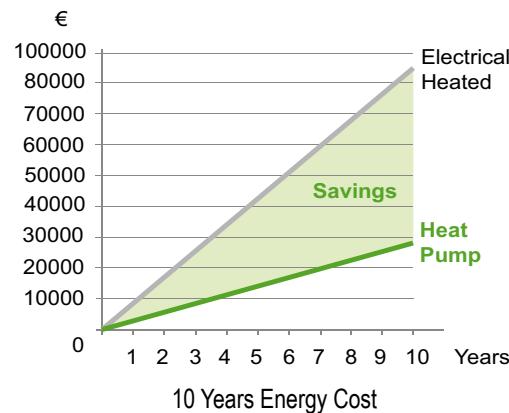

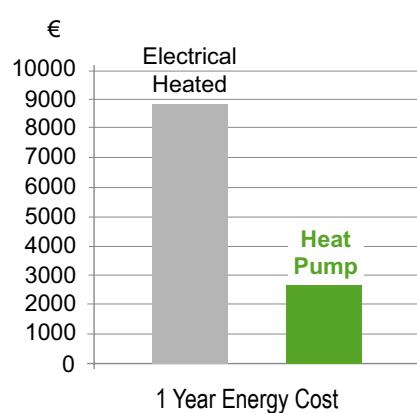

How much money can I save using a Heat Pump Air curtain?

Example:

Door dimension: 2 m width by 3 m height
Running time: 12 hours/day, 6 days/week, 26 weeks (~ 1/2 year)
Energy cost: 0,17 €/kW/h (EU-27 average cost)
Selected unit: G 2000, 28kW
COP: 3,31 (Coefficient of Performance)

	Electrical Air Curtain		Heat Pump Air Curtain		Difference
Total Heating Power	28	kW	28	kW	0 kW
Air Curtain Price	3.800	€/unit	11.400	€/unit	+ 7.600 €
Energy Consumption	52.416	kW/h	15.836	kW/h	- 36.580 kW/h
Energy Cost	8.911	€	2.692	€	- 6.219 €
CO ₂ Emissions	20.966	kg	6.334	kg	- 14.632 kg

Result: The payback period is 1,8 years. We recover the price increase of Heat Pump air curtain in less than two years and then we start saving energy, money and CO₂ emissions to the environment.

Characteristics

- Heating or Heating/Cooling energy saving heat pump air curtains: up to 70% reduction in costs and CO₂ emissions (in heat/cool mode).
- Self-supporting casing construction made of galvanised plated steel, finished in structural epoxy-polyester RAL 9016 as standard. Other colours or stainless steel construction are available on request.
- Low noise double-inlet centrifugal fans driven by an external rotor motor with built-in thermal protection contact. Provided with 5-speed selection.
- Micro-perforated inlet grille with filter functions and easy service. It does not need prefilter.
- Low turbulence discharge nozzle with double blow-out vane, airfoil shaped, adjustable from 0 to 15° each side.
- Includes direct expansion coil with sensors. Optional condensate water pump.
- Control panel and 7m of telephone cable with fast connectors type RJ45 (Plug & Play), included.
- DX Interface KIT with TOSHIBA programmable control.
- TOSHIBA Digital Inverter outdoor heat pump unit (R410A) with expansion valve.

Characteristics

- Self-supporting casing construction made of galvanised plated steel, finished in structural epoxy-polyester RAL 9016 as standard. Other colours or stainless steel construction are available on request.
- Centrifugal double-inlet fans driven by an external rotor motor with built-in thermal protection contact. Provided with 5-speed selection. Very low noise level.
- Two frontal grille options.
- "P" type includes water heated coil. "E" type includes electrical shielded element, 3 power stages with power switches included. "A" type is without heating, air only.
- Anodised aluminium blow-out vanes, airfoil shaped, adjustable from 0 to 15° each side.
- Control panel and infrared remote control IR included. 10m of telephone cable with fast connectors type RJ45 (Plug & Play). Optional: Interface to connect to BMS.

Grille Finishes

Industrial

Decorative

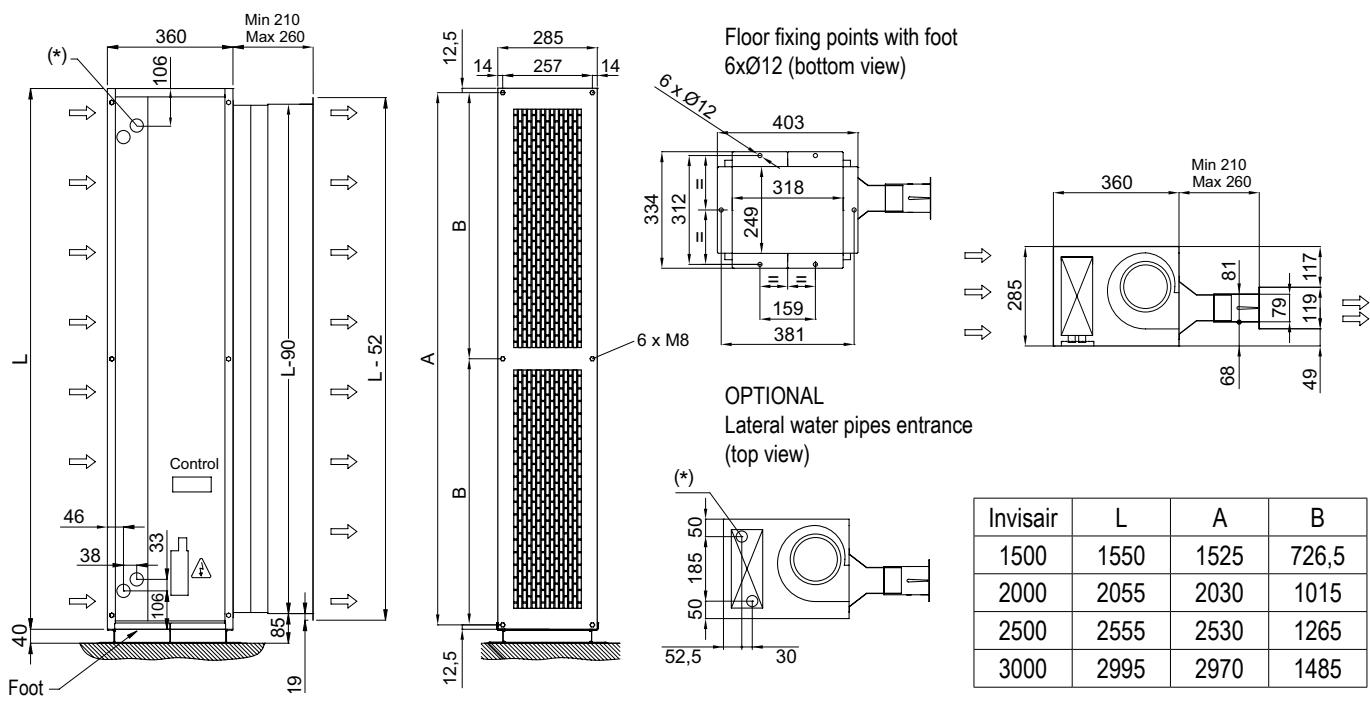

Characteristics

- Specially designed for applications where the body of the air curtain is to be installed inside a column or bulkhead for architectural reasons. It can be vertically or horizontally mounted.
- Inviair air intake and discharge grille are in the same plane so that the air flow through the unit is in a straight line. Intake into the bulkhead or column should be by a suitable grille provided by others.
- Two anodised aluminium adjustable lamellas, airfoil shaped, so that air discharge direction can be adjusted to 0 – 15 degrees either side.
- Structure made of galvanised plated steel finished in structural epoxy-polyester white RAL 9016 as standard. Other colours are available on request.
- Low noise centrifugal double-inlet fans with external rotor motors, with built-in thermal protection contact, provided with 5-speed selection.
- “P” type includes water heated coil (2x3/4”).
- “E” type includes electrical element shielded element, 3 power stages with power switches included.
- “A” type is unheated, air only.
- Control panel and infrared remote control IR included. 7m of telephone cable with fast connectors type RJ45 (Plug & Play). Optional: Interface to connect to BMS.

Characteristics

- Specially designed to be installed in all type of revolving doors. Two possible layouts, tailored dimensions.
- Structure made of galvanised plated steel, finished in structural epoxy-polyester white RAL 9016 as standard. Other colours are available on request.
- Double-inlet centrifugal fans driven by external rotor motors, with built-in thermal protection contact, provided with 5-speed selection. Very low noise level.
- Perforated inlet grille with filter functions and easy service. It does not need prefilter.
- "P" type includes water heated coil (2x3/4").
- "E" type includes electrical shielded element, 3 power stages with power switches included.
- "A" type is without heating, air only.
- Circular anodised aluminium outlet vanes, airfoil shaped.
- Control panel and infrared remote control IR included. 7m of telephone cable with fast connectors type RJ45 (Plug & Play). Optional: Interface to connect to BMS.

Layouts and dimensions

RotoWind air curtains are tailor-made for any kind of revolving door according to the following layouts:

On top mounting

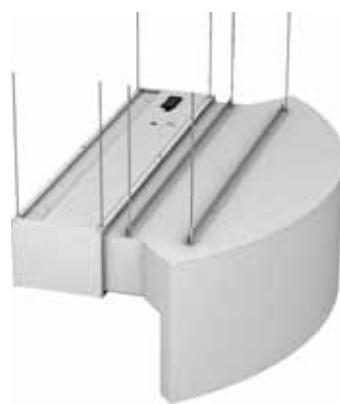

False ceiling mounting

Fixation system

Fixed onto the door

Hanging from the ceiling

Optional decorative front cover

1. RAL 9016 standard
2. Colour from RAL palette
3. Stainless Steel AISI 304

Characteristics

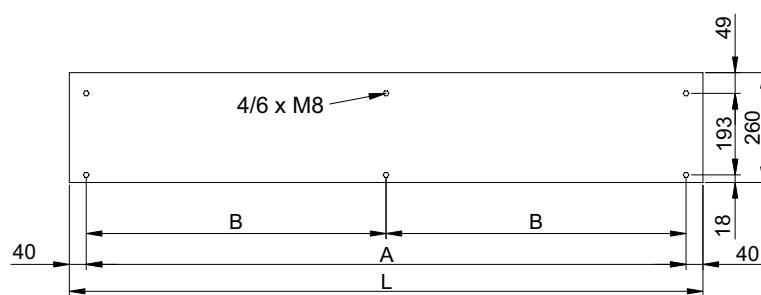

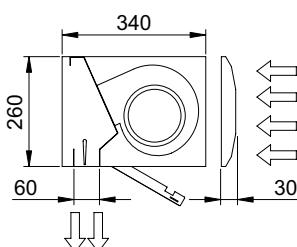

- Specially designed to be installed on doors of cold stores and freezers.
- Self-supporting casing construction made of galvanised plated steel, finished in structural epoxy-polyester RAL 9016 as standard. Other colours or stainless steel construction are available on request.
- Double-inlet centrifugal fans driven by external rotor motors, with built-in thermal protection contact, provided with 5-speed selection. Very low noise level.
- Also available with flat micro-perforated inlet grille, more elegant, for commercial doors where heating is not needed.
- Anodised aluminium outlet vanes, airfoil shaped, adjustable from 0 to 15° each side.
- Control panel and infrared remote control IR included. 7m of telephone cable with fast connectors type RJ45 (Plug & Play). Optional: Interface to connect to BMS.

2000	1920	960
2500	2420	1210
3000	2920	1460

Characteristics

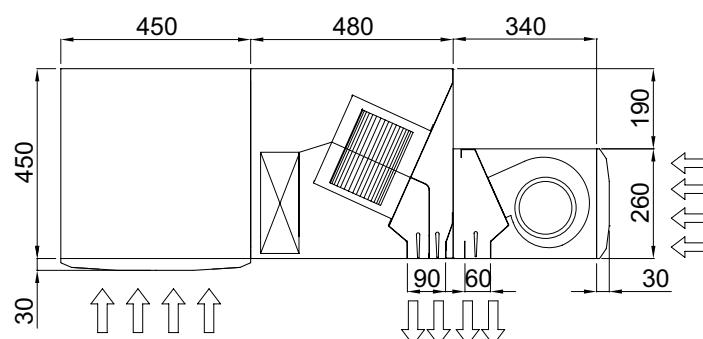

- Specially designed to be installed on big doors of industrial cold stores and freezers.
- System composed by two air curtains: special Duojet with plenum and Kool. The result is a combination system of 3 jets at different temperatures and different speeds.
- Structure support with lateral walls to cover 100% of the opening with 3 jets should be provided by others.
- High efficiency barrier against big amount of thermal losses due to a big temperature difference (shorter payback).
- Avoid mist and ice, decreasing risk of accidents.
- Casing construction made of galvanised plated steel, finished in structural epoxy-polyester RAL 9016 as standard. Other colours or stainless steel construction are available on request.
- Anodised aluminium outlet vanes, airfoil shaped, adjustable from 0 to 15° each side.
- Double-inlet IP 55 centrifugal fans driven by external rotor motors, with built-in thermal protection contact, provided with 5-speed selection. Very low noise level.
- Includes electrical shielded element, 3 power stages with power switches included.
- Electronics and controllers IP65. Duojet with Automatic Total Control and Kool with Air Only control, both with telephone cable Plug & Play. Optional: Interface to connect to BMS.

Specifications

Dimensions

Characteristics

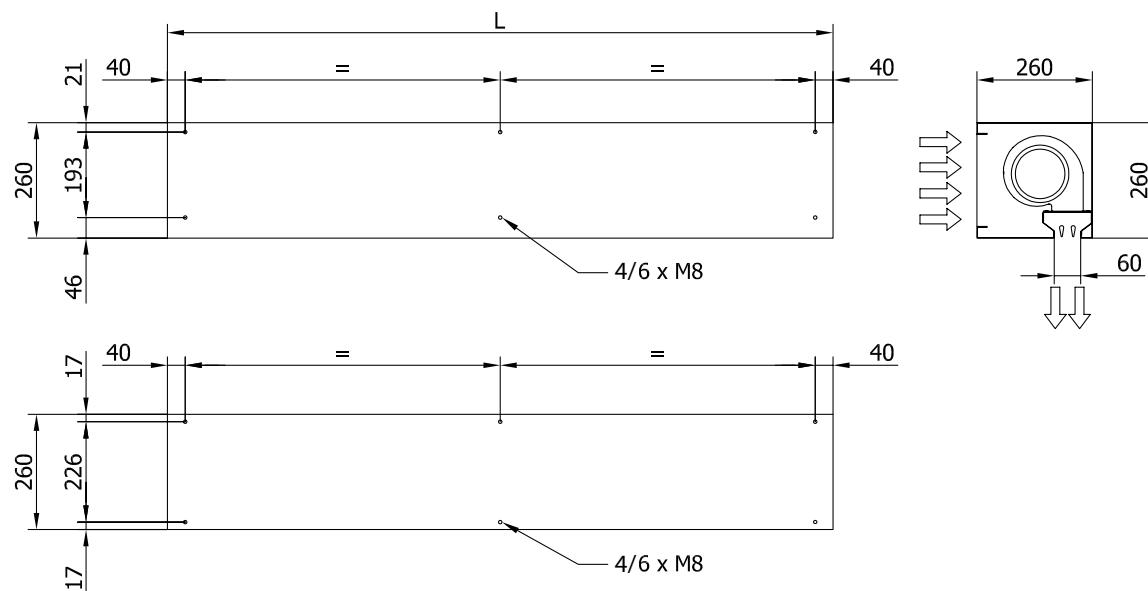

- High pressure and small dimensions air curtains.
- Self-supporting casing construction made of zinc plated steel, finished in structural epoxy-polyester RAL 9016 as standard. Other colours or stainless steel construction are available on request.
- Double-inlet centrifugal fans with external rotor motors, with built-in thermal protection contact, provided by 5-speed selection. Very low noise level.
- Perforated inlet grille of big surface to reduce the energy loss at minimum. It does not need maintenance.
- All models are without heating, air only.
- Anodised aluminium outlet vanes, airfoil shaped, adjustable from 0 to 15° each side.
- Control panel and infrared remote control IR included. 7m of telephone cable with fast connectors type RJ45 (Plug & Play), included. Optional: Interface to connect to BMS.

Characteristics

VP

(with profiles)

VW

(windbox construction)

- Designed to be tailor-made, adaptable to any customer's needs.
- Option VP: Structure made of aluminium profiles and galvanised plated steel panels, finished white RAL 9016 as standard. Other colours are available on request. VP construction allow the service from the top and the bottom.
- Option VW: Self-supporting casing construction as Windbox SMG, made of galvanised plated steel, finished in structural epoxy-polyester RAL 9016 as standard. Other colours or stainless steel construction are available on request.
- Double-inlet centrifugal fans driven by external rotor motors, with built-in thermal protection contact, provided with 5-speed selection. Very low noise level.
- "P" type includes water heated coil. "E" type includes electrical shielded element, 3 power stages with power switches included. "A" type is without heating, air only.
- Anodised aluminium outlet vanes, airfoil shaped, adjustable from 0 to 15° each side.
- Control panel and infrared remote control IR included. 7m of telephone cable with fast connectors type RJ45 (Plug & Play). Optional: Interface to connect to BMS.

Specifications

The performance of Variwind air curtains is the same as Windbox S,M,G.

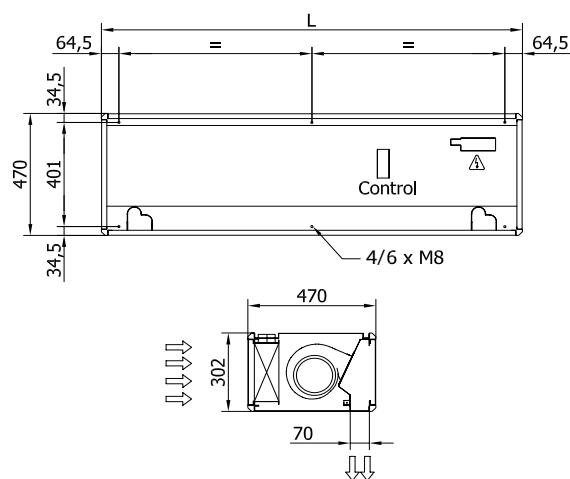

It has S, M and G types from 1000 to 3000 mm length. It's available unheated, water heated, electrical heated or with heat pump.

Layouts and dimensions

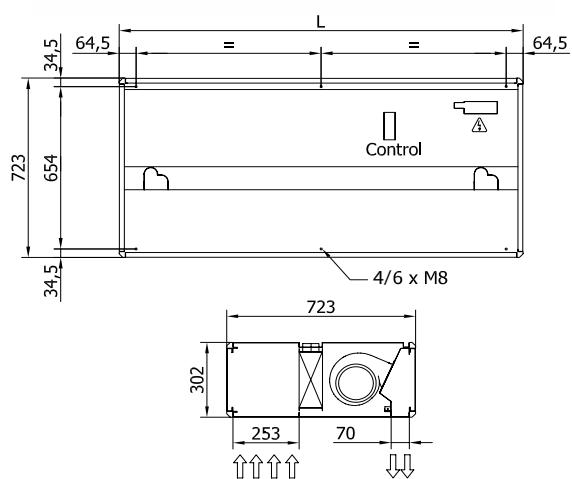

VariWind air curtains can be tailor-made at the request of the customers in any length from 1045 mm to 3000 mm.

	Standard L (mm)	Customised L (mm)
Variwind 1000	1045	1045-1544
Variwind 1500	1545	1545-2049
Variwind 2000	2050	2050-2549
Variwind 2500	2550	2550-3000

Free hanging mounting

Inside ceiling surface mounting

Characteristics

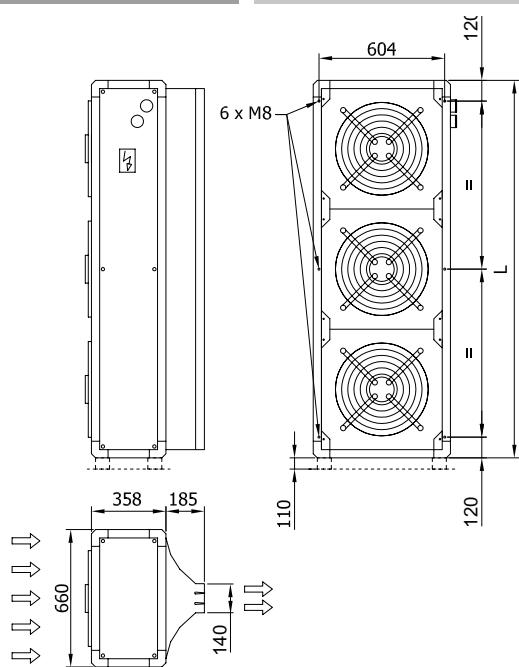

- Usually installed in vertical position but can be mounted horizontally on industrial doors.
- Heavy casing made of double chamber, aluminium profiles and galvanised plated steel panels, finished white RAL 9016 as standard. Other colours are available on request.
- Axial fans driven by an external rotor motor with built-in thermal contact protection. Provided with 5-speed selection. Extremely low noise. Maintenance free.
- "P" type includes water heated coil. "E" type includes electrical shielded element, 3 power stages. "A" type is without heating, air only.
- Anodised aluminium outlet vanes, airfoil shaped, adjustable from 0 to 15° each side.
- Control panel and infrared control IR included. 10m of telephone cable with fast connectors type RJ45 (Plug & Play). Optional: Interface to connect to BMS.

Correction factors for water temperatures (S, M, G, L, XL)

The technical data tables give the nominal heat capacity for warm water coils supplied with water at 80/60°C, 60/40°C and 50/40°C with the air inlet temperature at 15°C, 18°C and 20°C.

These tables supply the corresponding factors for calculating the heat capacity with different air and water inlet temperatures.

Water			Air Inlet Temperature			Water			Air Inlet Temperature		
Coil	Difference	Temperatures	15°C	18°C	20°C	Coil	Difference	Temperatures	15°C	18°C	20°C
80/60 2 rows	20°C	100/80	1,58	1,53	1,46	50/40 4 rows	20°C	100/80	3,26	3,11	3,01
		90/70	1,35	1,27	1,22			90/70	2,79	2,64	2,54
		80/60	1,11	1,04	1,00			80/60	2,32	2,17	2,07
		70/50	0,89	0,82	0,78			70/50	1,83	1,69	1,59
		60/40	0,66	0,59	0,54			60/40	1,35	1,21	1,11
		55/35	0,54	0,47	0,42			50/30	0,85	0,68	0,58
	15°C	100/85	1,72	1,64	1,59		15°C	80/65	2,47	2,34	2,24
		90/75	1,47	1,40	1,35			70/55	2,01	1,86	1,77
		80/65	1,22	1,14	1,09			60/45	1,53	1,39	1,30
		70/55	0,97	0,90	0,86			50/35	1,05	0,91	0,83
		60/45	0,73	0,66	0,61			60/45	0,73	0,66	0,61
		50/35	0,48	0,40	0,35			10°C	60/50	1,71	1,57
60/40 3 rows	10°C	80/70	-	1,28	1,20			50/40	1,24	1,10	1,01
		70/60	1,09	1,02	0,97			40/30	0,77	0,62	0,53
		60/50	0,84	0,77	0,72						
		50/40	0,59	0,52	0,48						
		40/30	0,35	0,27	0,22						
		100/80	2,86	2,71	2,62						
	15°C	90/70	2,45	2,30	2,21						
		80/60	2,03	1,89	1,81						
		70/50	1,61	1,48	1,40						
		60/40	1,21	1,08	1,00						
		50/30	0,80	0,67	0,59						
		60/45	-	1,22	1,14						

Example of heat capacity calculation:

Model M 2000 P 80/60°C

Air inlet temperature 15°C

Water temperature 90/70°C

$$\text{HEAT CAPACITY} = \text{Nominal Power} \times \text{Coefficient} = 31,86 \text{ kW}$$

(23,6 kW) (1,35)

CONTROL AND REGULATION

Two ranges of control panels, both designed for easy and quick Plug & Play connection, free of mistakes, by using a telephone cable with RJ45 connectors. The digital communication between the control panel and air curtain is a very reliable connection without

information losses even at long distances. All control panels can be turned ON/OFF externally and have internal memory (if the power supply is cut off, the unit goes back to the selected state).

2 Speed Range

Suitable for Optima and Recessed Optima air curtains.

CW-2AO-NE
Only air and water control panel
2 fan speed

CE-2AO-NE
Electrical control panel
2 fan speed and
2 heating stages

5 Speed Range

Suitable for Windbox, Recessed Windbox, Deco, Rund, Rotowind, Variwind, Compact and Max air curtains.

CA-5AW-NE
Only air control panel
5 fan speed

CW-5AW-NE
Water control panel
5 fan speed and
electro-valve switch

CE-5AW-NE
Electrical control panel
5 fan speed and
3 heating stages

D-805 Hand/Auto
Water control panel (Optional)
Manual and automatic operating.
Auxiliary functions with anti-freeze sensor, door contact and ambience thermostat.

Common Control panels

TD
Digital Thermostat
Modifies heat stages and fan speed depending on temperature and selected program. Only for electrical units.

Interface
Allows the connection to a centralized management system like BMS...

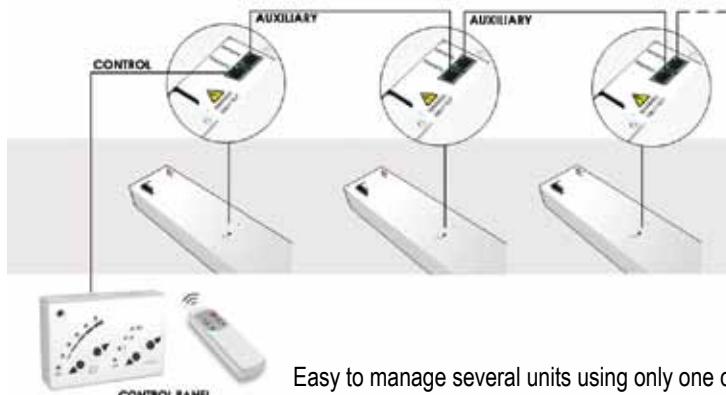

CT – Total Control
Suitable for all models from Optima to Max (except Minibel).
Auxiliary devices: anti-freeze sensor, door contact, thermostat, etc...
Time programmer: 3 ON/OFF for each different day of the week.
Digital display with hour, fan speed, heating stage, temperature...
Multilanguage display 9 languages.
Manual or automatic functioning with programmable behaviours.

IR Control
Infrared remote control.
Available for all models except Minibel.

Multiple air curtain connection

Easy to manage several units using only one control panel.

Accessories

Feet, wall supports, vibration dampers...

Thermostatic valve, solenoid valve, anti-freeze sensor, door contact, ambient thermostat...

Telephone cable, extension adapter ...

Other Options

Airtecnics as an air curtains specialist can produce units with special requirements under request.

Here there are some of the possibilities:

- External alarm signals as: unit working, heating ON, airflow switch, dirty grille, electronic overheating signal, fans overheating TK, electrical heating blocked, etc...
- Special water or steam coils for higher temperatures or different power than standard
- Tailor made electrical heating elements at desired power and power supply
- Electrical heated air curtains from 400Vx3 to 230Vx3 or 230Vx1
- Dummies (empty air curtains) to combine with working units
- Industrial air curtains at 400Vx3 with the same advantages of electronic regulation 5 speed range
- Industrial MAX with higher volume (MAX L)
- Industrial MAX with explosion proof EX fans
- Stainless steel AISI-316 or other materials under request
- Special RAL colour with gloss or other finishes. Special BS (British Standard), Tiger Drylac, etc...
- Complete tailor made air curtain or our standard range customized according to client needs

Please consult us for further information or other options.
